CONDOMINIUM CORPORATIONS IN OTTAWA-CARLETON

JUNE 1992 LIST

This is a list of the 561 condominium corporations in Ottawa-Carleton that have been created as of June 1992 (the first condominium was created in 1969). These corporations are created under provincial legislation which calls for them to be run by a board of directors elected by the owners of the constituent units. For the most part, these units are residential - though increasing numbers of newer ones are commercial, industrial, office condominiums, or some combination. And for most of the residential condominiums, the owners are also residents of the units, although some operate as rental housing with the units owned by investors.

In condominiums, each owner has exclusive ownership of his or her unit (from the inside of each exterior wall) but shares in the ownership of the "common elements", such as parking lots, recreation areas, and of course the basic building structure. Each owner must pay monthly fees to the corporation which are used to pay for water service (units do not have individual meters), snow clearance and landscaping, building insurance and upkeep, and costs associated with the management.

Condominiums, although functioning primarily as property managers, also play the role of a property owners' association, concerned with issues similar to those of any neighbourhood-based or merchants association. It was in an attempt to reach these associations that the Planning Department of the Regional Municipality first started this list in 1985.

The list provides the most useful information on each corporation:

Number

The number for each condominium in Ontario is established sequentially by county. ***This list is organized by this number***. Ottawa-Carleton has condominiums in two counties, Carleton and Russell (land registry records in Ontario retain this historical anachronism). All but 17 are "Carleton County Condominiums" or CCCs, for short; the condominiums in the Township of Cumberland are known as RCCs or Russell County Condominiums, since Cumberland was originally part of the County of Russell. The latter are found at the end of the list in the thousand-series, e.g., #1009 is RCC9.

Popular Name

Most condominiums have a name by which the units were marketed by the builder. This usually becomes better known than the condo's number. *Note the Popular Name Index (List C)*. Some popular names are the condominium's street address, e.g. "400 Laurier"; these are at the top of the list in numerical order by the first digit. Those without a popular name are usually condominiums with few units. We would appreciate assistance in locating additional popular names.

Street

This is the mailing address of the corporation, not necessarily the address of the condominium. Very often this address is that of the management company - for those condominiums that have chosen to hire one - who passes information on to the board of directors. The address is used to mail the Planning Department's newsletter, *in process*, several times a year by first class mail. When mail is returned by the post office, the correct address is found and changed accordingly.

Management

This field is reserved for the identity of the manager of the condominium. If it is "self-managed", this field is usually left empty. For most, the manager is a management company. *Note the Index by Management Company (List A)*.

Phone

This is always a workday phone number.

Construction Information:

The ***number of units*** distinguishes between row units vs. apartment units. If both amounts are zero, the condominium is a non-residential (industrial or commercial or office) condominium. The ***date of construction*** is the year and month (YYMM) when the condominum was registered, usually some months after construction (or in the case of the condominium being a conversion from a rental project, some year after). The ***builder*** is identified by usualy one key word. Sometimes the builder is a numbered company or a one-project-only subsidiary of a larger company.

Nearest Intersection

This is a more specific reference to the location of the condominium than GCode. Where the street name is used in the popular name, the reference here will be only to the intersecting street (e.g. If the title is "Greenbank Court" and is on Greenbank Road, the reference here would be, "at XXX, where XXX is the closest intersecting street"). Apartment buildings often have their address (e.g. 99 Bank Street) as their popular name.

Update

We include an UPDATE field that refers to the latest date (YYMMDD format) we have confirmed this information. When the DD section is missing, it refers to the fact that we used a secondary source to confirm our information.

GCode

This is a reference to the municipality and, for the larger municipalities, the ward within the municipality. See table on next page. *Note the Index by Geographical Code (List B).*

INDEX BY POPULAR NAME

(NOTE: Sometime condominiums are referred to by a name rather than a number. Popular names are usually created for the marketing of the condominium. Not all condominiums have one, and others may have one, but we are not aware of it. A few have more than one name and are listed under both. Some names are preceded by "The" and are found in the T's alphabetically. Please phone us with additions or corrections.
